

**NATIONAL SYSTEMS CONSULTING**

Staff Augmentation . Software Consulting . Offshore Development

## **Enterprise Applications**

Enterprise Applications are software applications that allow businesses to access and manage real-time information and transaction processes across an entire organization. SAP Enterprise Application solutions help our clients achieve high performance, deliver value by increasing process efficiency; enhancing workforce productivity; cutting operating costs; boosting employee and customer satisfaction; and enabling better, faster decisions.

Successful businesses have deployed well-integrated SAP systems to improve efficiencies, enhance competitiveness and make significant savings in time and money. SAP solution puts the full capacity of the system to work for you bringing you the greatest possible return on your investment.

## **NSI SAP Competency**

NSI SAP Competency leverages its mature expertise to provide a wide range of dependable, secure, high-performance applications and solutions for your organization. Our domain expertise coupled with strong processes and best practices assist in delivering solutions on time and within budget. We work with you to align your IT strategy with your business goals, ensuring that your solution is dynamic enough to respond quickly to changing business needs.

NSI helps you at every phase of pre and post implementation, including:

- Business Process Analysis and optimization
- System and infrastructure Architecture
- Prototyping and Pilot Implementations
- Process Design
- Implementation & System Configuration
- System Maintenance

## **Essential SAP Experience**

SAP applications can be the most important and enduring investment your company can make - with a life Expectancy of 12-15 years. Your SAP initiative does not start with scoping and end with "going live". It starts with defining business objectives and "ends" with continuous business improvement. Thus, the selection of your SAP partner is so important. It isn't just an implementation transaction - but a long-term relationship. You need a SAP partner who has the essential experience to get enduring results.

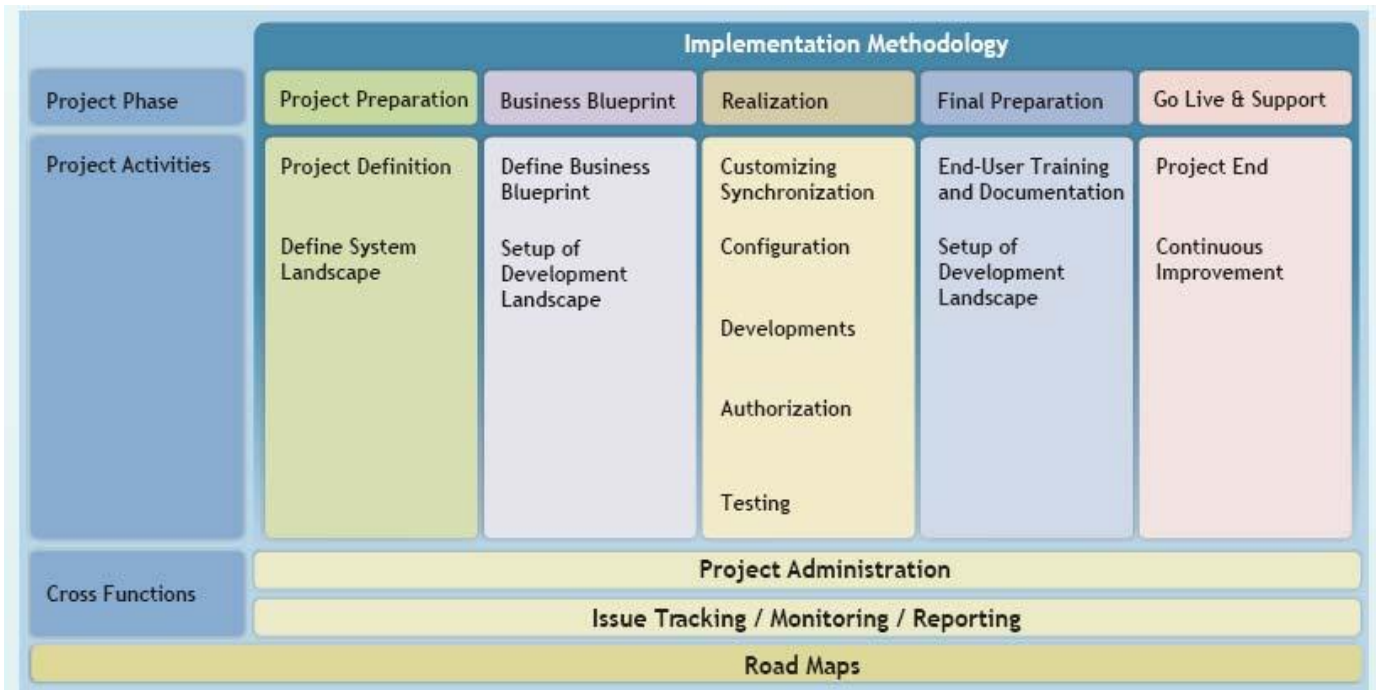

## SAP Service Offerings

NSI offers following services in SAP space:

### Complete lifecycle Implementations

We do complete lifecycle implementations using proven implementation methodology in the areas of SAP R/3 / CRM /PLM.

The ASAP methodology covers the complete cycle of project from initiation to completion & Post-implementation in well defined stages as shown below.

### Version Upgrade & Rollout Support

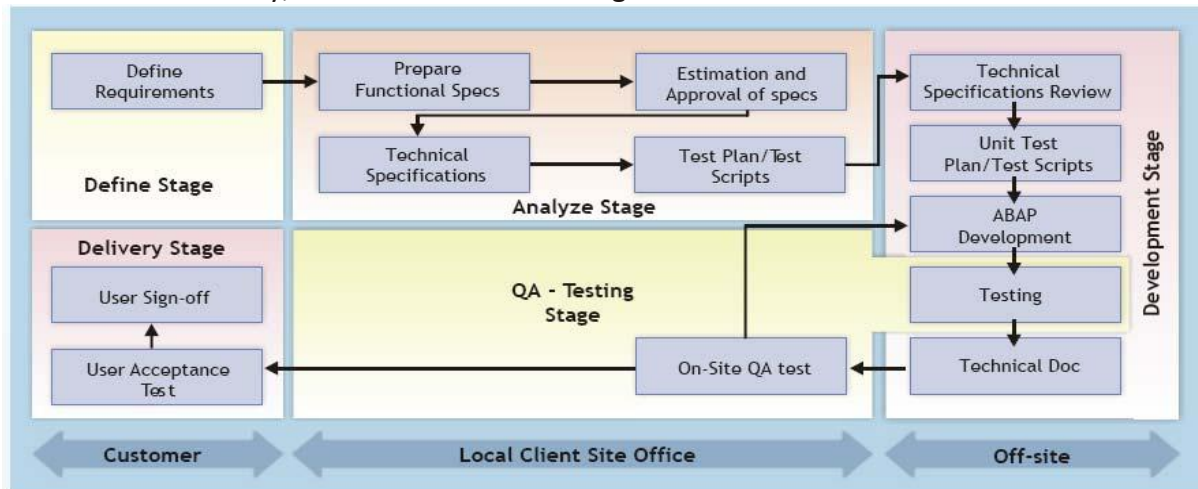

Our unique upgrade methodology and processes help customers upgrade their existing system at low costs and faster time to market. We incorporate the customer's strategic and operational requirements into the upgrade plan and make it a part of the overall IT strategy.

Some of our services include:

- Upgrade/Migration of versions
- Upgrade/Migration of customizations/add-on modules
- Upgrade/Migration of custom Reports & Forms
- Migration of legacy data to SAP system

## SAP ABAP Development

NSI offers ABAP development and consulting from its offshore ABAP services through its team of highly skilled ABAP/4 consultants having varied industry experience to meet client's requirements. At our center we use an ONSITE/OFFSITE combo to deliver high quality solutions consistently, as shown in the flow diagram.

We are involved in development of a third Party Package for interpretation of financial audit information from SAP R/3 in terms of a web based reporting package. This would enable business decision maker to take quick and timely decisions which would increase their profitability.

## Help Desk Support

NSI 24 x 7 x 365 help desk support provides users with trustworthy and timely resolutions to their queries.

The help desk specialists have access to our knowledge bank comprising of learning gained from several years of experience in implementation and troubleshooting.

This can reduce direct support costs, minimize loss of user productivity and turn your support service into a competitive asset.

## Dedicated SAP Testing Services

We provide testing services for SAP R/3, PLM, CRM and BW. Services offered include:

- Test Management
- Test strategy & planning
- Test case development & maintenance
- Test design
- Functional Testing (manual & automated)
- Functionality testing
- Regression testing
- Client support for UAT setup and UAT management
- Non-Functional Testing
- Performance testing load & stress
- Internationalization
- Usability
- Interoperability / Compatibility

## Integration of SAP with Non-SAP Systems

The challenge faced by many enterprises today is the non-harmonized use of a host of software products in several specialized areas of operations. It becomes imperative on part of the organization to integrate all these applications so that real time information flows smoothly across the entire system. NSI leverages its experience and Technical Expertise in ABAP, Integration using BAPI, ALE, IDocs, and Java based development to build these integrations.

NSI also offers:

- SAP Corporate Training
- Staff Augmentation & On Demand Consulting Services (Onsite & Offsite)

## NSI Advantage

- Strong understanding of customers requirements from Business & Technical perspective
- Deep industry experience in Enterprise Consulting
- A well established SAP Practice with optimum mix of functional & technical consultants
- A well established process testing practice with expertise in both manual & automated process testing procedures
- Best practice methodology for Implementation, upgrade, rollout, maintenance & production support
- Expertise in system Integration, thereby ability to integrate SAP with other applications
- A customer centric organization with a flexible approach

## Our Team

NSI SAP Implementation Team is comprised of skilled professionals who have an average of over 10 years experience in direct, hands-on SAP implementations. This group also has an average of seven years of business experience, making our consultants well versed in business and business processes. Many of our consultants have business backgrounds as logistics managers, accountants, plant supervisors, production engineers, and chemists. Our technical expertise includes many consultants who are skilled in IS management, programming, systems analysis, software engineering and application development. We understand what it takes to be successful in deploying and maintaining SAP in your business, whether it is transitioning from the systems you've been running for years or streamlining your operations to achieve efficiencies.
